I.P. Instrument Panel

NOTE: Due to certain characteristics of leather, such as the elasticity and factory processing methods, always test first to make certain the material you are working with is coatable. Some types of leather must be vat dyed and cannot be coated with vinyl dyes or **COLOR COATS**. Consult **RAP-1 REFINISHING AUTOMOTIVE PLASTICS AND VINYL**S for detailed information.

NOTE: Refer to **RAB-2** for complete illustrations on plastic repair and refinishing procedures. For groups of 10 or more, please contact **SEM** for details of workshops covering these refinishing techniques.

EVERY SHOP DESERVES  QUALITY EVERY DAY
