DESCRIPTION

Metal Bite Finishing Glaze is a two-component polyester finishing glaze that quickly fills sand scratches and other minor imperfections. Purchase includes 1 tube of blue cream hardener.

FEATURES

• Optimized viscosity flows into surface imperfections diminishing pinholes and bridging over scratches
• Fast drying to a tack-free finish
• Superior sanding qualities extend life of sandpaper
• Can be applied over properly prepped OE paint
• Flexible for use on semi-flexible plastics

SUITABLE SUBSTRATES

• Aluminum
• Steel
• SMC
• Fiberglass
• Properly prepped OEM paint

**Working time:** 3 – 5 minutes @ 100 grams

**Sand time:** 10 – 15 minutes @ 70°F (21°C)

Note: Cure times are dependent on several factors including temperature, airflow and humidity.

Check local VOC regulations to ensure compliance in your area.

HANDLING AND APPLICATION

PREPARATION:

1. Clean area with SEM Solve or XXX Universal Surface Cleaner. The surface must be free of dirt, oil, grease and rust.
2. Sand area to be filled with P80 – P180 grit paper.
3. If necessary, blow off and if necessary, re-clean with SEM Solve or XXX Universal Surface Cleaner.
MIXING:

1. Knead container well before dispensing.
2. Mix a ribbon of cream hardener with a golf ball sized quantity of Metal Bite™ Finishing Glaze.
3. Stir the mixture until a uniform color is achieved. Mix no more than what can be used in 3 minutes.

APPLICATION:

1. Apply the mixture to the repair area using a spreader. The film build should not exceed 1/8 inch.
2. Allow the area to cure for approximately 10 – 15 minutes and then sand with P180 grit paper.
3. Refer to the paint manufacturer’s instructions to complete the repair.

STORAGE:

Metal Bite Finishing Glaze should be stored between 40 – 80°F (4 – 27°C). The shelf life of Metal Bite Finishing Glaze is 1 year when stored under normal conditions.
